

## Meeting Agenda

Date: 2014-04-03

Facilitator:

Participants: David Oskarsson, Emma Nyborg, Kristofer Yffén

### 1. Objectives

We have a bug in our program that we are trying to find. Something makes the program to only read in the same song a couple of time, when what we want is a couple of different songs instead.

### 2. Reports

We have done enough implementation for us to show a use case, almost. The bug is an issue right now. The teamwork is working.

### 3. Discussion items (35 min)

(a) How do we do...?

To generate new music we use Markov chains .

(b) What to do...?

Connect our implementations with our GUI.

(c) Why is...?

To make it easy and smooth to use our program.

### 4. Outcomes and assignments (5 min)

Kristofer should fix when read a file , jump over the overhead and start to implement music theory and add some more alphabet.

Emma should connect generate-button and comboBoxes.

David should parse ABC to midi.

### 5. Wrap up

Next meeting will be on tuesday.
