Meeting Agenda

Date: 140325

Participants: Kristoffer Yffén, David Oskarsson, Emma Nyborg

1. Objectives: Finish the UML. Since we now are 3 instead of 2, come up with more features. Start with the RAD and SDD. More detailed list of the use cases.

2. Reports: Started with the UML-diagram and creating Use cases.

3. Discussion items:

(a) We discussed implementing some media player-features like play/stop/pause and showing a slider for the song length with ability to change where in the melody we are. This to extend the project a bit because we now are more people.

(b) Write RAD 1.1-1.3, create a slide with UML, create code-skeleton based on the UML.

(c) Explained our project idea to the newest member Emma.

4. Outcomes and assignments

(a) Kristoffer should invite Emma to our GitHub-repo and create a dia from the paper-UML.

(b) David should build GUI.

(c) Emma should create a account on GitHub. Learn basic git.

5. Wrap up

(a) We think we need more features =))

(b) Next meeting will be on Thursday 10.00 in Linsen.
