Meeting Agenda

Date: 140401
Participants: David Oskarsson, Emma Nyborg, Kristofer Yffén

1. Objectives

We still need to research a bit more to fully understand the abc-notation.

2. Reports

Nothing to report

3. Discussion items (35 min)

We should do enough implementation for our use case "Generate".

We should implement loading methods in MelodyLoader.
Add Melody class that basically IS the abc-text file which is all the overhead info and the notes.
Add code to Genre class.

The output when pressing 'Generate' should be something relevant.

4. Outcomes and assignments

We will work as a team with the initiating part in the project.

5. Wrap up

Next meeting will be on thursday. However, tomorrow we will spend the whole day setting up the first use case.
